REVIEW OF SELECT REVENUES

Revenues are estimated using a variety of methods and factors. The estimates were prepared using actual prior year amounts, projected collections for FY 2008, and trend analysis. Other factors were evaluated to determine their effect on the revenue amounts. These include anticipated changes in type or legal requirements of particular revenue, review of general economic conditions, impact of planned annexation, and analysis of the trends and conditions affecting particular revenue. Below, is a review of basic revenue groups and specific revenue types within each group.

Ad Valorem Tax

These revenues are all those collected based on the City of Rocky Mount's levy. These include Inventory Tax, Property or Ad Valorem Tax, Vehicle Tax and Tax Penalties.

Ad Valorem Tax is based on the property valuation as determined by the Nash and Edgecombe County Tax Assessors with the City's proposed levy of \$.58 per \$100 of valuation. Historically, the City has collected an average of approximately 97% of the levied tax.

\$18M \$16M \$14M \$12M \$10M \$8M \$6M \$4M \$2M \$M 1999 2000 2001 2002 2003 2004 2005 2006 2007 2008 2009 Actual Actual Actual Actual Actual Actual Actual Actual Actual Projected Proposed

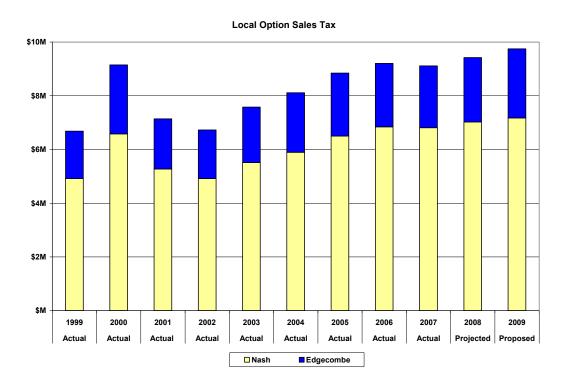

Current Ad Valorem Tax Collection

In Lieu of Tax is a payment from an Enterprise Fund that approximates the amount of ad valorem tax that would have been paid had utility service been provided by an investor-owned utility. The In Lieu Tax payment amount is calculated based on the gross fixed assets of the Enterprise Funds as reported in the City's most recent audited financial statement and the current tax rate. This In Lieu of Tax payment is required under the City's Utility Transfer Policy.

Income from Other Governments

These revenues are those received from other governmental units. Among these revenues are local option sales tax, franchise tax, beer and wine tax, Powell Bill proceeds and State and Federal Grants.

Local Option Sales Tax is collected by authority of the General Statutes by both Nash and Edgecombe Counties. Previously, the two half cent sales tax portions were dedicated to water and sewer system improvements. This dedication requirement has expired and all Local Option Sales Tax is now budgeted in the General Fund or the General Capital Fund. On an annualized basis, Local Option Sales Tax is estimated to increase no more than 2% in FY 2009, though additional increases are anticipated because of adjustments due to annexation.

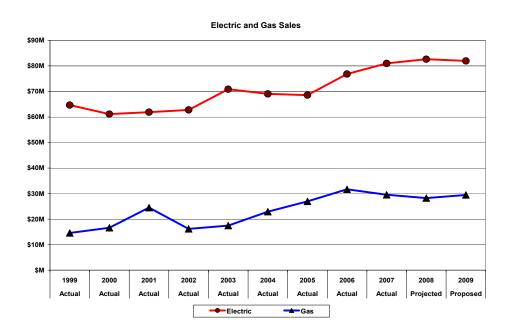

The State of North Carolina levies a **franchise tax** on electric, and natural gas service provided within the city limits of each City. This Franchise Tax is remitted back to the city from the state in quarterly payments. Due to its link to utility sales, this revenue is very sensitive to the weather. The City is projecting Franchise Tax to increase 2% to 3% for FY 2009. Along with this revenue is a tax on telecommunication service. There is no expected growth in the telecommunications tax, except that caused by annexation.

Powell Bill revenues are received from the State of North Carolina's gasoline tax. The funds are used for street and sidewalk construction and maintenance purposes as well as drainage improvements. The State of North Carolina has previously used funds from the Highway Trust Fund to balance the State budget, reducing funds available to local governments, but no similar action is expected this year.

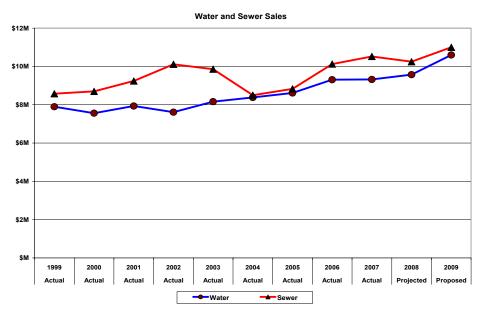

Charges for Services

These revenues include electric, gas, water, sewer and stormwater service revenues as well as building permit recreation fees and solid waste disposal monthly service charges.

Electric and Gas sales revenues are particularly difficult to forecast, as they are highly sensitive to the weather. These two utilities have seen some system growth, though the City lost some large utility customers in the past few years. Considering demand and the cost of purchased energy, the budget includes utility sales of \$80,450,000 in the Electric Fund and \$29,475,000 in the Gas Fund.

Water and Sewer sales are heavily impacted by usage, which was significantly reduced in the current year due in large part to conservation measures implemented in response to last year's drought. If conditions do not require similar measures in the coming year, usage will increase, though it is uncertain whether they will return to past levels, as customers develop strategies to reduce their usage in the long term. This year, the budget includes no water and sewer rate increases. We anticipate water sales of \$10,600,000 and sewer sales of \$11,000,000.

REVIEW OF SELECT REVENUES

Transfers from Other Funds

These are amounts that are transferred from one City fund to another. Below is an explanation of significant transfers.

An **Operating Transfer** is made by each enterprise fund (Electric, Gas, Water and Sewer) to the General Fund to represent a return on the investment of the utility. Typically, these transfers are made within the following guidelines:

- Electric Fund -- the amount transferred shall not exceed 3% of the gross fixed assets.
- Gas Fund -- the amount transferred shall not exceed 75% of the Income before Transfers
- Water Fund -- the amount transferred shall not exceed 50% of the Income before transfers.

Finally, the enterprise funds make **transfers** to the **Debt Service Fund** to cover the City's long term debt payments as well as the payments to the Nash-Rocky Mount Board of Education as a result of consolidation.

Other Revenues

Other Revenues include interest income, lease purchase proceeds, assessments, privilege licenses and revenues not classified above. Each of these revenues is evaluated individually and forecasted using a review of actual amounts, trend analysis and information on growth and changes in billing or collection method.

Fund Balance Appropriated

The appropriation of fund balance is necessary to balance projected revenues and expenditures. The level of appropriation is determined by the difference between recommended expenditures and estimated revenues for the upcoming fiscal year. The amount of appropriated fund balance changes from year to year.

ECONOMIC SUMMARY

Services provided by any institution, including local government, are heavily influenced by surrounding economic conditions. In the case of the City of Rocky Mount, the impact of developing trends on local, regional, national, and global levels can have profound effect on our ability to maintain a high quality of performance in City operations, both with respect to general government and utilities.

The following economic observations are utilized in the development of revenue projections and funding priorities for the Proposed Annual Operating Budget. City staff monitor these indicators on a regular basis in order to evaluate our position with respect to meeting budgeted revenues levels and remain within spending limits. When potential disparities are identified, action is taken to modify operations or financial planning in a manner that maximizes service quality. This can include transferring appropriations from other accounts on the basis of priority, reducing overall spending to reflect actual revenues, and deferring projects until financial conditions improve. If absolutely necessary, alternative funding measures, including increased appropriations from fund balance, are available.

Material Prices/Inflation

The traditional measures of inflation are the Consumer Price Index (CPI) for personal spending and the Producer Price Index (PPI) for businesses. These indicators are updated monthly by the Bureau of Labor Statistics, a division of the United States Department of Commerce.

Both indices are calculated by surveying the cost of goods and services that comprise a "shopping cart" for both individuals and businesses. The aggregate CPI is provided for both all consumers and those in non-salary (wage) or clerical positions. This is based on their assumption that these two groups possess different spending habits.

The chart below contains the aggregate CPI and PPI indices with respect to their annual rate of change (inflation indicator), as well as similar information on select items from their cost surveys that are for special consideration with respect to local consumer focus and indication of impact on the cost of City services. CPI information is also available specifically on a regional basis.

(As of March 2008)

(1.0.0)	Annual Change (%)		Annual Change (%)
Consumer Price Index (CPI)		Producer Price Index (PPI)	
National	4.0%	Finished Goods	6.9%
South Region (All Customers)	4.4%	Intermediate Goods	10.5%
South Region (Non-Salary/Clerical)	4.8%	Crude Goods	31.4%
Notable CPI Components		Notable PPI Components	
Motor Fuel	26.4%	Gasoline	36.4%
Public Transportation	7.5%	Soaps/Detergents	4.4%
Food	4.5%	Tires & Tubes	6.6%
Housing (Overall)	3.0%	Motor Vehicle Parts	0.9%
Housing Rent	3.6%	Phosphates (Chemicals)	53.9%
Household Energy (Overall)	6.8%	Cement	3.2%
Household Electricity/Natural Gas	4.1%	Asphalt	2.9%
		Sand, Gravel, Crushed Stone	7.9%
		Construction Equipment	2.3%

ECONOMIC SUMMARY

Current measures indicate significant increases in materials used to provide essential City services, especially fuel, treatment chemicals, and road maintenance and construction supplies. These increases are comparable, though not exact, with current and projected budget levels for related accounts.

While the CPI and PPI provide important information on inflation, the Municipal Cost Index (MCI) is often used to provide an aggregate measure of inflation with respect to the elements of government expenditures. This measure is provided monthly by *American City & County*, and incorporates the CPI, PPI, and a Construction Cost Index derived from an evaluation of construction-related materials.

(As of April 2008)		
	Change from 1	Change from 2
	Year (%)	Years (%)
Municipal Cost Index (MCI)	4.8%	7.5%

Fuel

Localized measures are available for examining the retail price of motor fuel, both unleaded gasoline and diesel. One such measure is the Fuel Gauge Report updated daily by the American Automobile Association (AAA) for several metropolitan areas.

(As of May 13, 2008 - Raleigh Metropolitan Area)						
•	Current	Current One Year				
	Price	Ago	Change (%)			
Regular Unleaded	\$3.74	\$2.96	26.4%			
Diesel	\$4.38	\$2.91	50.5%			

The City purchases fuel on the wholesale level in bulk supplies for use at pumps operated by Fleet Maintenance. However, retail prices strongly reflect proportional changes in wholesale bulk pricing.

Compensation

National and Regional information on changes in employee compensation are made available through the Employee Cost Index (ECI) published by the Bureau of Labor Statistics.

(As of March 2008)	
	Annual Change (%)
National Aggregate	3.3%
Wages	3.2%
Benefits	3.5%
Select Industries	
Manufacturing	2.9%
Health Care	3.3%
Education	3.6%
Service	3.4%
Local Government	3.5%
South Atlantic Region	3.7%

Unemployment

The Bureau of Labor Statistics publishes monthly reports on unemployment on the national aggregate, state aggregate, and local metropolitan area levels. Rocky Mount has the benefit of being a specific Metropolitan Statistical Area, with allows us to obtain a specific measure of our performance in this area.

Metropolitan Employment/Unemployment Statistics (for March 2008)

	Unemployment Rate				
MSA	March 2007	March 2008	Change	Rank	
North Carolina (Statewide)	4.4%	5.2%	18.18%		
Asheville	3.6%	4.4%	22.22%	3	
Burlington	4.9%	5.4%	10.20%	10	
Charlotte-Gastonia-Concord	4.3%	5.2%	20.93%	8	
Durham	3.6%	4.2%	16.67%	2	
Fayetteville	5.1%	5.4%	5.88%	10	
Goldsboro	4.2%	4.9%	16.67%	6	
Greensboro-High Point	4.6%	5.3%	15.22%	9	
Greenville	4.7%	5.7%	21.28%	12	
Hickory-Lenoir-Morganton	5.6%	6.4%	14.29%	13	
Jacksonville	4.1%	4.8%	17.07%	4	
Raleigh-Cary	3.4%	4.0%	17.65%	1	
Rocky Mount	5.8%	7.3%	25.86%	14	
Wilmington	3.7%	4.8%	29.73%	4	

As the table indicates, Rocky Mount has the highest unemployment rate in the state for metropolitan areas. This does have a significant impact on our economy and tax base with respect to per capita income, retail sales, housing values, and other factors.

Housing Prices

A strong indication of the health of the local real estate market is the average price for housing sales. For 2007, the average sale price in Rocky Mount was approximately \$117,549, a 1.1% decrease from 2006. This is likely indicative of the overall slowdown in the national housing market resulting from tightening of credit and increased foreclosure and default activity.

Conclusion

In the past, Rocky Mount experienced economic trends in a manner that provided a "lag time" following their presence on the national level. This enabled the City to prepare a response with respect to financial operations and ensuring delivery of essential government services. However, changes in the economic landscape have brought Rocky Mount and everyone else closer together with respect to the influence of national and global events. This is particularly true with regard to the price of fuel and other materials, which are heavily impacted by tightening supply and growing international demand.

Unemployment and housing information indicate that local economic activity is slowing and below levels achieved elsewhere in North Carolina. This can put significant pressure on the City's fiscal health, as it limits the ability to generate revenue from current sources sufficient to cover costs associated with both existing services and expansions desired by residents. Comprehensive evaluation and prioritization of government operations, updated to reflect constant change in our new economic climate, are critical to future continuance of the City's strong financial condition.
